

NEWS RELEASE

NATIONAL DEMOLITION ASSOCIATION EXECUTIVE DIRECTOR AVAILABLE FOR MEDIA INTERVIEWS

Michael R. Taylor, CAE, is available to the trade media for interviews on a variety of topics. His decades-long experience in the demolition industry both as a demolition contractor and an association director, gives him a unique view of the current state of the industry.

Doing a story on:

- Demolition services?
- Demolition safety?
- Recycling and re-use of demolition debris?
- Demolition industry education?
- Environmental remediation?
- Brownfields?

Contact :

Michael R. Taylor, CAE, Executive Director of the National Demolition Association, the leading trade organization for the global demolition industry. Taylor can speak clearly about today's sophisticated demolition techniques and services, as well as the industry's role as "Second Responders" after both natural and man-made disasters.

Education:

Taylor has an undergraduate degree in International Relations from St. Joseph's University and Master's degrees in Public Administration from Temple University and Central and Eastern European Studies from LaSalle University. He has done post-graduate work in Environmental Planning at Drexel University. He is a member of the American Society of Association Executives; the American Planning Association; the American Society of Safety Engineers; and is past president of the Delaware Valley Society of Association Executives. Taylor is current chairman of the ANSI A10.6 Committee on Demolition Operations.

The National Demolition Association is a non-profit trade organization representing more than 1,100 U.S. and Canadian companies and many international firms that are involved in the demolition process. Membership includes demolition contractors, general contractors, civil engineering firms, and recycling, landfill, and salvage operations. The Association's efforts help members stay abreast of environmental, regulatory and safety matters, keep regulators informed about issues facing the industry, increase public and industry awareness, and provide members with networking opportunities and information on the latest technical advances in equipment and services. The website is www.demolitionassociation.com.
