### **'MEMBERS ONLY' SECTION OF NATIONAL DEMOLITION ASSOCIATION WEBSITE PACKED WITH BUSINESS-BUILDING TOOLS**

***Directories of state licensing data and local C&D waste processors are among the business tools now available on the National Demolition Association's 'Members Only' section of its website [www.demolitionassociation.com](http://www.demolitionassociation.com). Members can also share scores of industry documents relating to the demolition process as a member benefit.***

DOYLESTOWN, PA, NOVEMBER 19, 2009 – The 1,000-plus member companies that comprise the National Demolition Association now have access to more business-building tools such as a source of comprehensive state licensing data, a directory of local construction and demolition (C&D) waste processors, and a library of important industry documents in the “Members Only” section of the upgraded website [www.demolitionassociation.com](http://www.demolitionassociation.com).

“The goal of the numerous upgrades we’ve made to our website since re-launching it in the spring is to give our members, whether they are demolition contractors, general contractors, or engineering firms, the tools they need to be leaders in environmental stewardship, safety, education, and professional competency,” said Michael R. Taylor, CAE, Executive Director of the National Demolition Association.

The State Licensing Locator covers information on the need for licensing for demolition and asbestos abatement projects as it pertains to individual states and provinces of the United States and Canada. The listing contains the name of the authorizing government body and phone and website contact information. The Mixed C&D Waste Processors directory allows the member to click on a specific state for a full list of qualified providers, including full contact information.

The Document Archives is populated with scores of documents pertinent to professional in the demolition industry. Categories that can be searched include environmental, events, hazmat, industry, members, recycling, and safety. A quick search option allows the member to access the document quickly, while members are also encouraged to upload appropriate documents for fellow members’ use.

The Member Services section of the National Demolition Association website now offers marketing opportunities for any company interested in communicating with this key demographic of the demolition industry.

For more information about the Members Only section of the website or details on how to become a new member of the National Demolition Association, go to [www.demolitionassociation.com](http://www.demolitionassociation.com) or contact the Association at [info@demolitionassociation.com](mailto:info@demolitionassociation.com) or by calling 800-541-2412.

The National Demolition Association is a non-profit trade organization representing more than 1,100 U.S. and Canadian companies and many international firms that are involved in the demolition process. Membership includes demolition contractors, general contractors, civil engineering firms, and recycling, landfill, and salvage operations. The association's efforts help members stay abreast of environmental, regulatory and safety matters, keep regulators informed about issues facing the industry, increase public and industry awareness, and provide members with networking opportunities and information on the latest technical advances in equipment and services. The website is [www.demolitionassociation.com](http://www.demolitionassociation.com).
