# Environmental EXCELLENCE AWARD

**RAPID RECOVERY®**

**Rapid Recovery, Inc**  
*Nationwide*

## Refrigerant Recovery

**F**ounded to assist contractors in meeting the Clean Air Act requirements for refrigerant recovery, Rapid Recovery created two proprietary refrigerant recovery machines to handle any low, medium or high pressure needs, enabling the company to achieve faster recovery times than most common equipment. In 2009 alone, Rapid Recovery helped contractors reduce Carbon Dioxide (CO<sub>2</sub>) emissions by over 1.1 billion pounds in the U.S. Many refrigerants are CFCs that are leading cause of ozone depletion contributing to climate change.
