

Excellence in Demolition Application 2021

Questions

Responses

Excellence in Demolition

The goal of this award is to recognize high - quality and unique demolition projects that have taken place over the past year. Any company may apply for more than one project category.

In addition to this form, you will need to complete and submit your Excellence in Demolition Poster that will be displayed at Demolition San Diego. Your poster narrative can focus on one or several of the areas below. Your project does not have to contain all of those elements in order to be considered for the award.

Download the poster template here: <https://www.demolitionassociation.com/About/Awards/Excellence-in-Demolition-Awards>.

Keep in mind that all entries below should be listed and spelled properly, as all titles, names, etc will be used for awards winners, and promotional materials for all finalists. Any files that are uploaded will be shared outside of the organization they belong to.

The deadline to submit this form is September 8. 2021.

For questions about the process, please contact info@demolitionassociation.com or call (202) 367-1152.

2021 Excellence in Demolition Awards

Each of the submitted poster applications will use the following areas to grade and score the project:

Sustainability

A significant portion of your project involved implementing proper processes that use resources efficiently, did not generate hazardous wastes and promoted beneficial reuse and recycling of building components and material. This would include material management for recycling of materials that could be used in the future.

Community Enhancement

The project recognized the need to support the local community by involvement, enhancement, including economic development by use of local workforce and training, local use of commerce and materials.

Environmental Enterprise

The work pertained to the development and implementation of unique and innovative solutions that provide significant environmental and social benefit. Consider technical feasibility and commercial viability.

Education

The work involved developing educational programs for the local community and extended beyond those associated with specification compliance programs. Conducted outreach to the local community and provided vocational training for long term employment. Provided an open forum for the public to learn the benefits and aspects of the demolition industry.

Pollution Prevention and Resource Conservation

Project implemented a comprehensive and formalized policy program, systems and procedures that extend beyond required compliance measures and was able to use resources wisely and train employees.

Special Project Considerations

Project implemented specialty innovations or circumstances that recognizes required innovation on the part of the contractor. Development of alternative methodologies that benefits the industry as a whole.
