

## Infrastructure Policy

### EXECUTIVE SUMMARY

The National Demolition Association (NDA) strongly supports infrastructure development and believes infrastructure projects are necessary to improve public safety, promote environmental stewardship, and ensure the smooth flow of goods and services across the country. Investments in highways, bridges, public transit, disaster relief and other infrastructure projects support job creation and pave the way for continued economic growth. NDA also supports policies to streamline the federal permitting process and cut unnecessary red tape to expedite the delivery of infrastructure projects to states and local communities. Permitting reform will help ensure a more efficient and timely implementation process of the Bipartisan Infrastructure Law to the benefit of the American public.

### POLICY RECOMMENDATIONS

- Support continued funding and implementation of the 2021 Bipartisan Infrastructure Law.
- Support investments in infrastructure projects, specifically facility rehabilitation, construction and demolition in schools, hospitals, water/wastewater, electricity, airports and inland waterways, ports and other public facilities.
- Support the Airport Improvement Program, which funds improvements at airports across the nation.
- Support the Environmental Protection Agency's Brownfields and Superfund grant programs to encourage environmental sustainability.
- Support policies to streamline the federal permitting process for infrastructure projects, including the use of concurrent reviews and reasonable time limits for agency decisions.
- Support strengthening existing infrastructure tools, such as Private Activity Bonds.
- Support market-oriented solutions to address supply chain disruptions and strengthen the movement of goods in the United States.

### REQUEST

**NDA urges Members of Congress and the Trump administration to support robust infrastructure development and continued implementation of the 2021 Bipartisan Infrastructure Law. Policymakers should also pursue reforms to the federal permitting process to expedite and improve the delivery of critical infrastructure projects to local communities.**
